About us

At Rocket Science, we believe in constantly challenging the status quo. As a reputable medium-sized organisation we are leading the way when it comes to delivering innovative, cost-effective IT solutions to our ever-growing customer base.

Rocket Science was founded in 2000 by a technology enthusiast with a vision to provide premium support to Apple Mac users in Johannesburg. We quickly became known for our quick response times, superior service and knowledgeable teams. Fast forward two decades and Rocket Science has evolved to offer a broad array of IT Services nationwide from preventative maintenance to architecting and building IT infrastructures, all specifically designed to meet the unique needs of our customers.

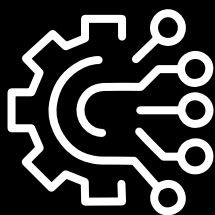

“Technology is nothing. What’s important is that you have a faith in people, that they’re basically good and smart, and if you give them tools, they’ll do wonderful things with them.”

- Steve Jobs
